

Marine Evacuation System

Each Marine Evacuation System comprises:

- >> an inflatable inclined evacuation slide;
- >> a large capacity inflatable liferaft (canopied or open reversible);
- >> a lightweight stowage cradle manufactured in marine grade aluminium;
- >> a simple lightweight MES exterior door and coaming.

Strength

- >> Manufactured from durable, lightweight and abrasion resistant advanced polyurethane coated nylon fabric.
- >> Unique multi air-holding compartment design enhances structural integrity.

Flexibility

- >> Range of slide lengths provides options to install our MES at all evacuations heights up to 13.6m.
- >> Single and double evacuation path slide options to optimize individual ship evacuation plans and evacuation rates.

Increased Safety

- >> Provides a rapid yet safe and controlled dry shod descent for all passengers and crew.
- >> Less traumatic for all evacuees. Slide evacuation path always clear and useable.
- >> Clear line of sight from top of the slide to the liferaft at all times.
- >> Simple for crew to communicate and control evacuation.
